CLIFF INDUSTRIAL

613 Wisconsin St., Eau Claire, WI

COMPONENT MANUFACTURING | REPAIR SERVICES | TOOLING AND FIXTURING | DRIVE COMPONENTS

Providing High Quality Machining Services Since 1980!

Cliff Industrial has been providing repair services, metal component manufacturing, drive compents, tooling and fixturing to Wisconsin and surrounding areas since 1966! When you come to us, our qualified staff will help you with all your metal fabricating needs. You can rely on us to be your complete source for quality materials and precision fabrication.

We provide both manual and automated maching services including:

> Mill & Lathe Work
> Grinding
>Welding
> Spray Welding
> Hardfacing
> Sharpening Services
> Line Boring
> Prototype
> Precision Saw Cutting
> Drilling & Countersinking Holes
> Threading Pipe & Rod
> Swiss Precision Machined Parts
> EDM Wire CNC Machining
> Small Parts Press Stamping

If you have a project you may not have considered us for in the past we would appreciate the opportunity to work with you. **Give us a call at 715-835-8314.** Ask us about our Free Shipping!

QUALITY MACHINING SERVICES

More information available at www.cliffindustrial.com.

Metal Component Manufacturing

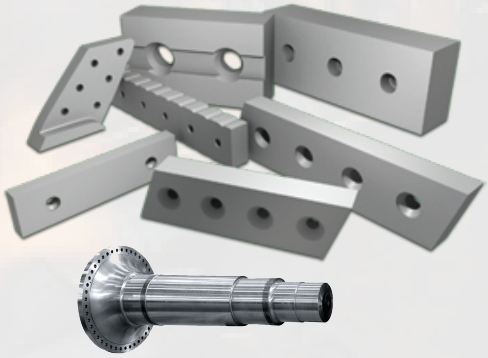
We have recently added the capabilties of swiss precision machined parts and EDM machined parts. We have the ability to deliver the small, high precision parts necessary for the manufacturing of critical components. We run a lights-out maching facility creating a fast turn around for your machined components.

Cliff Industrial produces parts of brass, stainless, CRS, aluminum, tellurium copper, and many others. Cliff has capabilities of multi axis milling and turning, to include cyndrical base parts under 1.125" for large quantities using our auto feed system and larger parts over 1.125" using our manual feed system.

Most common component parts we produce are spacers, fasteners, nozzles, poppets, electronic connectors, and precision shafts.

Repair Services

We recognize the cost effectiveness of rebuilding a large piee of equipment utilizing original components to reduce cost. At Cliff we understand having a machine down can cause production and revenue loss. **This is why we offer expedite services!**



Cliff Industrial offers repair services including shaft rebuilding, spray welding and reshaping, rotating shaft bearing resurfacing, worn components repair, blade sharpening and anvil rebuilds.

Do you have repair parts coming from overseas to get replaced? We may be able to build replaements from scratch faster and cheaper!

Tooling and Fixturing

Cliff Industrial is recognized for the high quality service and tooling we provide our customers. We use the latest technology to meet your requirements.

We provide extrusion die parts with few cavities and extrusion friendly profiles including deckles and breaker plates.

Drive Components

Cliff Industrial offers a wide selection of industrial drive components including, gears, belts, pulleys, bearings, sprockets, roller chains, or any metal fabrication product.
